

AT-30 Corrosion Inhibitor

Product Description

A clean, water-dilutable, multi-purpose corrosion inhibitor that provides excellent corrosion protection for steel parts. It is a clear liquid that is safe, easy to use and leaves a very light, non-tacky film after drying.

Typical Properties

Appearance Clear light amber liquid
Solubility in water..... Complete
pH..... 8.0 - 9.0
Density 8.6 lbs/gallon

Application

Spray, brush, dip, or coat on cold/hot rolled steel substrates.

Use Directions

Recommended dilution range is from concentrate to 3%. Please consult your Metal Mates Service Representative to determine the optimum concentration for your specific application. Mixing Instructions: Add water to inhibitor while mixing. Concentration can be conveniently measured by titration. Refer to AT-30 Titration Procedure.

Safety and Handling

Avoid contact with eyes and prolonged contact with the skin. Wash thoroughly after handling. Minimum contact with this and all chemicals is a good policy to follow along with reading the Material Safety Data Sheet.

Storage

Indoor storage preferred. First in first out stock rotation is recommended. If frozen, allow to thaw then mix thoroughly.

Container Size

5 gallon pails, 55 gallon drums and 330 gallon totes.
